OLUSESI KHALID ADEBANJI

Full-Stack Developer • Next.js · React · Go · PostgreSQL

Lagos, Nigeria • 09038244886 • Olusesikhalid43@gmail.com

PROFILE

Full-stack developer with hands-on experience building and deploying production web applications using Next.js, React, TypeScript, Go, and PostgreSQL. Comfortable working across the full stack, from responsive frontend interfaces to REST APIs, authentication, and database design, and quick to pick up new tools and frameworks as a project requires. Looking for a junior software engineering role to contribute real, production-ready work on a team.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, shadcn/ui, React Hook Form, Zod, Tiptap

Backend: Go, Gin, REST APIs, JWT Authentication, Better Auth, CORS

Database: PostgreSQL, GORM, SQL, Convex

Tools: Git, GitHub, Vercel, environment configuration

Testing: API Testing (Postman)

SELECTED PROJECTS

A selection of full-stack applications built and deployed independently, among others.

KhalFinTrack — Personal Finance Web Application | *Next.js · Go · Gin · PostgreSQL · GORM · JWT*

- Built and deployed a full-stack finance tracker with a Next.js frontend and a separate Go/Gin REST API backend.
- Designed the app around dashboard, transactions, categories, budgets, and reports pages with a PostgreSQL data layer via GORM.
- Implemented JWT-based authentication and per-user data scoping, verified by testing that one user cannot access another user's records through the API.

KhalNote — Note-Taking Web Application | *Next.js · React · Convex · Better Auth · Tiptap · Tailwind CSS*

- Built and deployed a full-stack notes app with rich-text editing (Tiptap), tagging, favorites, reminders, and trash/recovery.
- Implemented authentication and private, per-user data access using Better Auth and Convex.
- Worked around Convex's 1MB document size limit by building client-side image compression with the Canvas API for cover image uploads.
- Built a responsive interface with a custom collapsible sidebar (CSS transition animation), dark mode, and an integrated AI chat feature for querying stored notes.
